

## Tergus Poised for Growth

The leader in complete topical pharmaceutical development, services and manufacturing boasts state-of-the-art facilities and seasoned researchers

Research Triangle Park, North Carolina – July 21, 2014 – Tergus ([www.TergusPharma.com](http://www.TergusPharma.com)) has positioned itself for continued growth and expansion in the coming months. The company, which delivers dermatological product development, research and analysis, recently opened a state-of-the-art facility at Research Triangle Park in Durham, North Carolina. The company has a stellar, 18-year track record of successfully providing comprehensive services as well as regulatory guidance, documentation and support.

“We have assembled a team of more than 30 experienced researchers who are as committed to quality, compliance and results as we are,” said Vijendra Nalamothu, PhD, CEO and co-founder of Tergus. “We not only work hand-in-hand with our clients’ development teams, we also meet regularly with each other to discuss new issues and conduct trainings on the latest breakthroughs in dermatological pharmaceutical research.”

The company recently added a 20,000 square foot, state-of-the-art facility which boasts fully-equipped formulation, analytical, In Vitro Release Testing (IVRT), skin biology and clinical supplies manufacturing GMP laboratories. The facility has several banks of IVRT and skin penetration cells and advanced clean-room environments. The labs will further enhance Tergus’ ability to provide complete topical product development services to clients.

“We founded Tergus with the goal of becoming the market leader in start to finish topical product strategy and development,” Kailas Thakker, PhD, Tergus president and co-founder said. “Our new facility and our growth strategy for the coming months have positioned us to completely realize our goals.”

Tergus Pharma’s services range from formulation through testing and manufacturing. The company leads the pack in topical pharmaceutical services.
