

Tergus Pharma

Think Topicals, Think Tergus

Getting a promising new topical product from lab to patient is challenging. Making it all the way through the development pipeline will be time-consuming, involve a certain amount of risk, and will certainly be unpredictable.

That's why it makes sense to **think ahead** and **partner with the topical experts** that can give pharma companies like yours more opportunities for **success, every step of the way**.

At Tergus Pharma, we have the **proven ability** to understand and anticipate the needs of organizations large and small—even in the face of changes in the market, regulatory environment, or corporate strategy. And we've always been **committed** to meeting those needs. Whether through our **unrivaled expertise** in R&D, providing clinical trial materials, and now the addition of full-scale commercial manufacturing, we are **eager to support** every aspect of your topical drug pipeline.
